

Technical data: Input $230-400 . \mathrm{V}$ at $50 / 60 \mathrm{~Hz}$ and Output $2 \times 12 . \mathrm{V}, 2 \times 24 . \mathrm{V}, 2 \times 55 . \mathrm{V}, 2 \times 115 . \mathrm{V}$ ( $2 \times 12$ and $2 \times 24$ since to 1600.VA)

Reference regulations: separating transformers (EN 61558-1 CEI 96-3), control transformers (EN 61558-2-2 CEI 969), isolating transformers (EN 61558-2-4 CEI 96-8) and safety transformers (EN 61558-2-6 CEI 96-7).

Protection index: IP00
Ambient temperature: $35^{\circ} \mathrm{C}$
Thermal insulation class: $\mathrm{B}\left(130^{\circ} \mathrm{C}\right)$
The transformers are immersed in an insulating liquid
Class "I": Grounding ; Class "II": Galvanic insulation

Power supply single phase transformers are realised according to the European legislation EN 61558-1 and CEI 96-3, to the American legislation UL 506 and UL 1585 and to the Canadian legislation CSA 22.2 n66 in order to be used in the electromechanical and electronic industry and electromedical field as well.

The single phase is characterised by the magnetic core ( $\mathrm{E}+\mathrm{I}$ ) which is composed by a central column where the body of the winding is introduced and by two side columns that close the circuit.

The supply voltage must not exceed 1000VAC and 500 Hz .
The transformers are immersed in an insulating liquid and/or tropicalized for a better yield and a better reliability in wet places.

Our products are entirely realised in Italy with first choice raw materials strictly selected in order to guarantee the best quality and safety.
